## SUMMARY OF PROPOSED PROJECT (MAXIMUM 300 WORDS)

This project basically an university application. Project has 3 parts. 1st social networking site of all university students like Facebook Students will contact each other easily for a help purpose and any query related about course and advantage of university social circle goes to big. 2nd part social networking site of sirs and only students. Students any query about course or they will contact HOD, Registration Department head easily like. Students first send application to a respected teachers if teacher comfortable to student query very important so he will accept application and allow to chat with sir and solve the query. Final part that we created LMS. LMS has this features course related numbers like breakup course related books and materials and schedule of courses uploaded by a teacher for students. They very helpful for all students.

## PROJECT OBJECTIVE(S)/OUTCOMES

This project has many outcomes and very helpful for every university because social media every where and even every company use social media for work purpose and marketing purpose. So many professional companies use this system like this project. So many universities use this system social networking app provide to a students and students also taking interest on this social app. This project will be taking so many outcomes to universities because university has three parts and no tension of course material no tension of faculty to solve the query to all students easily and even no tension for all students because. Students will have social networking site we will created social circle easily and This product also increase marketing to a university because any student tell to other friends like My university provide and web app its very easily access and other people interest on this university feature
